## PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of experience building responsive SaaS dashboards, CRM systems, marketplace platforms, booking flows, landing pages, and business web applications using React.js, Next.js, JavaScript, Tailwind CSS, and REST APIs. Completed 15+ frontend projects with focus on reusable UI components, role-based dashboards, API-driven workflows, authentication screens, data tables, forms, modals, loading states, error handling, localization-friendly layouts, and mobile-first user experiences.

## CORE SKILLS

**Frontend:** React.js, Next.js, JavaScript, ES6+, HTML5, CSS3, TypeScript fundamentals

**Styling and UI:** Tailwind CSS, Shadcn UI, Bootstrap, Framer Motion, Swiper, Responsive Design, Figma-to-Code

**API and State:** REST API Integration, JWT Authentication, Redux, Pagination, Filtering, Dashboard Metrics, Loading States, Error States

**Tools:** Git, GitHub, Vercel, Figma, Postman, Jira, Trello, VS Code, Swagger

**Product Areas:** SaaS Dashboards, CRM Systems, Admin Panels, Lead Management, Appointment Workflows, Service Requests, Role-Based Interfaces

## PROFESSIONAL EXPERIENCE

**Frontend Developer | Pak Dev Studio** | Pakistan | Jan 2026 - Present

Working on enterprise-level SaaS dashboards, CRM systems, business workflow platforms, marketplace applications, and AI-enabled dashboard interfaces.

- Built frontend modules for a multi-role SaaS platform covering service requests, appointments, leads, projects, payments, AI showcase flows, and admin dashboards.
- Delivered role-based dashboard flows for 7+ user types, including Super Admin, Back Office, Sales Rep, Telemarketer, Auditor, Pro Applicant, and Service Provider.
- Created reusable React and Next.js components for data tables, filters, modals, forms, status badges, validation messages, loading states, and empty states.
- Integrated REST APIs for authentication, pagination, filtering, dashboard metrics, status workflows, appointment grouping, and dynamic business views.
- Improved dashboard usability across desktop and mobile by refining spacing, responsive behavior, sticky actions, error feedback, and cross-device consistency.
- Supported localization-ready UI patterns for longer French labels, flexible table headers, translated status text, and multilingual dashboard screens.

**Frontend Developer | Marvellex Software Solutions** | Islamabad, Pakistan | Jan 2024 - Dec 2025

Worked on enterprise web applications, dashboards, MERN-based frontend systems, landing pages, booking platforms, hiring products, and business websites.

- Built responsive web applications and enterprise dashboard interfaces using React.js, Next.js, Tailwind CSS, Bootstrap, and Shadcn UI.
- Converted Figma designs into production-ready frontend pages with accurate spacing, reusable sections, clean component structure, and cross-browser compatibility.
- Integrated REST APIs for authentication, dynamic workflows, filters, forms, dashboards, chat features, booking flows, and user account management.
- Developed reusable UI components for MERN stack applications, marketplace systems, hiring platforms, real estate portals, business websites, and CRM-style dashboards.
- Enhanced user experience with mobile-first layouts, animations, interactive sections, loading states, validation messages, and consistent UI patterns.
- Collaborated with backend developers and designers to deliver production-grade frontend features aligned with business requirements and user workflows.

## SELECTED PROJECTS

---

### **DAR SaaS Business Management Platform** - Multi-role SaaS business management platform

- Built a centralized dashboard for managing leads, clients, service requests, appointments, payments, projects, AI showcase flows, and business operations.
- Implemented role-based frontend flows for admin, sales, telemarketing, auditor, provider, and client-side users with API-connected screens.
- Developed responsive tables, filters, appointment grouping, status workflows, document handling screens, and dashboard interaction patterns.

### **AI Showcase Dashboard** - AI-powered business showcase interface

- Designed and developed guided frontend workflows for generating logos, descriptions, identity packs, social media content, newsletters, photos, and catalog assets.
- Built responsive input, preview, submission, and result screens using Next.js, React.js, Tailwind CSS, and REST API integration.

### **Tele Prospecting CRM** - Lead management and sales workflow dashboard

- Created CRM screens for managing leads, assigning sales representatives, booking appointments, tracking call outcomes, and updating prospect statuses.
- Integrated API-driven lead data, filtering, pagination, assignment workflows, status badges, and responsive dashboard layouts.

### **Talent Tube Hiring Platform, Jobify Marketplace, Real Estate and Booking Websites** - Frontend and landing page projects

- Built modern landing pages, marketplace interfaces, hiring platform screens, real estate UI modules, booking forms, hero sections, CTAs, and responsive content flows.
- Delivered mobile-friendly pages using React.js, Next.js, Tailwind CSS, animation libraries, reusable sections, and clean Figma-to-code implementation.

## EDUCATION

---

### **Bachelor of Science in Computer Science (BSCS) | University of Agriculture, Peshawar | 2020 - 2024**

Relevant focus: Software Engineering, Database Systems, Web Development, Frontend Development, and final-year web application work.

## CERTIFICATIONS

---

- Frontend Web Designing
